SKAGERAK
DENMARK

SKAGERAK
INDOOR LIVING

Maissi Bench p. 70

Welcome to Skagerak's indoor collection. For more than 40 years we've been crafting long-lasting furniture and accessories with a modern, Nordic touch. And when we say long-lasting, we really mean it! Crafted from high quality materials only and designed with a timeless expression – our products are meant to live a long and functional life; preferably through generations.

Sustainable choices. In Skagerak, we believe it pays off to be humble, make an effort and take responsibility – always. When we think of quality, it is not only a matter of materials, look and function. True quality in design can only be achieved when it's made under the right conditions – in harmony with both people and planet. That's why we are proud to say that we have been FSC™-certified since 2003, members of the UN Global compact since 2010, and became a certified B Corp in 2017.

Indoor news. For this year's collection, we have initiated new Nordic collaborations with the result of design-news such as the Maissi bench, Jut cabinet, Opening trays, Ratio cutting boards and Piippu slow brewer. We hope you'll give them all a warm welcome.

Yours sincerely,
Skagerak
Jesper and Vibeke Panduro

INDOOR COLLECTION

MATERIALS/ INDOOR

Oak is a sturdy and hardwearing type of wood containing natural tannins that will protect against bacterial growth. The Skagerak oak comes from European forests and is either 100% FSC™-certified or FSC™-mix certified, supporting sustainable forest management. Several of our furniture produced in oak can be ordered in treatments that suit your needs. The treatments available are white soap, white oil or natural oil which all protect and strengthen the wooden surface.

Teak is a heavy, hard and sturdy type of wood. The high content of natural oils makes it highly resistant – perfect for functional everyday items in your home such as household articles and furniture. Our 100% FSC™-certified Teak comes from Central America and Brazil, while the rest of our Teak comes from plantations in Indonesia and Trinidad; managed to sustain a renewable and reliable supply of wood.

Ash is a light type of wood with a living structure and the Skagerak ash comes from European forests. Its strength and durability make a good choice for indoor furniture and accessories.

Leather is a strong and natural material that gets a beautiful patina over time and we use different types of leather – grain leather when we need the strong durability of the leather, anilin leather for a softer but still natural appearance and protected leather when we need a sturdy material that is easy to clean.

Wool Several of our indoor cushions are made in wool. We have chosen to work with wool because it is a natural material that gives a sublime comfort due to its softness and ability to absorb/give off humidity. Moreover wool is naturally dirt resistant. We use Kvadrat and Gabriel fabrics for our indoor cushions.

Brass is an alloy of copper and zinc, popular for its superb malleability, hardness, corrosion resistance and attractive appearance. Brass will tarnish over time, but with a little care, the surface can be cleaned with brass polish and shine again.

Terracotta is a beautiful looking type of earthenware. All our terracotta products are produced in Portugal where the terracotta is naturally occurring. Our pots and vases are low-fired so we can play with colours and surfaces and our tableware collection is high-fired to give a more sturdy product.

Porcelain is an elegant yet hard material which offers great resistance toward scratches and heat. All our porcelain products have a matte outside and is glazed on the inside, which ensures a high food safety and beautiful servings. On top of that, the porcelain is easy to clean and oven-proof.
