**SKAGERAK**  
DENMARK

Overlap Table & Bench

Spaces and relations matter Spaces relate to the people who use them and to their mutual relations. One of the most important tasks is to make people feel comfortable and at ease while underlining the purpose of the space – be that a lounge area, a restaurant or a patio. At Skagerak we work with both outdoor and indoor contract spaces, making long-lasting quality a natural and sustainable choice.

For more than 40 years we have been crafting design with a contemporary Nordic touch. Our collections are deeply rooted in Scandinavian heritage and craftsmanship, and Skagerak is known for making beautiful, functional and sustainable furniture that lasts for generations.

Sustainability runs deep in our veins – as reflected in our choice of materials, in our production and in the way we treat suppliers, partners and employees. That is why we have been FSC™-certified since 2003, proud members of the UN Global Compact since 2011 and a certified B Corp business since 2017.

Our values are important to us and we take pride in building long-standing relations. With you and your company. And with the people who inhabit the places that we help furnish.

We look forward to guiding you to the best possible solutions.

Welcome to Skagerak Contract!

## MAKING SENSE OF SUSTAINABLE CHOICES

*Can we afford to continue business as usual? It might sound ironic, but to keep things the way they are – we have to change a lot.*

The world population and global middle class are growing rapidly, and more people are moving to the cities. This will increase the demand for basic goods, housing, energy, heating and water. This wouldn't necessarily have to be a problem – if it wasn't for resources becoming scarce, a rising problem in inequality and climate change. The sum of these realities is, like it or not, that we will have to do way more with a lot less. More products, buildings and power – less pollution, CO<sup>2</sup>-emissions and extraction of virgin materials. Is that possible?

The short answer is yes. But we have to think smart, and adapt. We have to start considering environmental and social performances within society as equally important to economic growth and profit. In fact, these elements are each other's preconditions, not counterparts.

And then we have to stop our endless consumption and waste patterns – and see things for what they really are. For too many years have we thrown out useful and valuable materials. Time has come to stop this linear thinking and start putting stuff into circulation. To design things that can be repaired, reused, decomposed and regenerated.

### What we do in Skagerak

In 2017, we joined the global B Corp movement – looking for new ways to use

our business as a force of good. B Corps are certified 'benefit corporations' meeting high standards of social and environmental performance, accountability and transparency.

For us to join B Corp the goal is not to compete to be the best in the world – but to help each other becoming the best FOR the world. And that is vital, for as a globally operating company, we have a great responsibility for today's development.

That's why we're striving to keep the utmost quality in three aspects: design, production and our relation to people and the planet.

An example of this is our newest initiative – Reclassic!

To Reclassic something is to pass on a valued item. When one family's cherished classics become a new family's Reclassics. From Skagerak Store in Copenhagen, we promote the buying and selling of used Skagerak furniture – some dating 20 years back. This way, we keep valuable material in circulation rather than seeing it being stored away or thrown out unnecessarily. That's good for society and even better for the environment.

You see, we've always designed things to last for generations. But how do we know they will? What happens when people change their surroundings and needs? When they leave their townhouse behind for a new island adventure, or have to move abroad for the job they've always wanted. In these cases, we make it easier to move on without leaving good things behind. To keep calm and Reclassic.

/ CEO Jesper Panduro

Royal Chair Reclassic  
– still cherished 25 years later.

**"TIME HAS COME TO STOP THIS LINEAR THINKING AND START PUTTING STUFF INTO CIRCULATION. TO DESIGN THINGS THAT CAN BE REPAIRED, REUSED, DECOMPOSED AND REGENERATED."**

What has become an old classic for one person can become a Reclassic for someone else.

Overlap Table & Bench

Plank Bench

## RESTAURANT NOMA

Outdoor benches and tables for the world-famous two-star Michelin restaurant headed by René Redzepi, which recently relocated to new surroundings in Copenhagen.

## SVINKLØV

Dining room chairs and outdoor furniture for the rebuilt historical hotel situated near the scenic coastline of north-western Jutland.

Selandia Armchair

Drachmann Bench & Table  
Lise Chair

Vester Chair

## RESTAURANT BABYLON

New restaurant run by the renowned chef Frederik Bille Brahe. The restoration and revival of the romantic historical building by one of the lakes in Copenhagen includes outdoor patio furniture by Skagerak.

Drachmann Collection / Messina Umbrella / Capri Umbrella Foot

Between Lines Deckchair / By Your Side Table / Riviera Sunbed  
Messina Umbrella / Capri Umbrella Foot

## RESTAURANT NIMB

Outdoor furniture for the rooftop restaurant in the Tivoli Gardens, with its spectacular view of the city, and for the garden by the fountain.

Let's change the world, one piece of furniture at a time For Skagerak quality means everything. We approach quality as a three-stage process that begins with aesthetics, takes on substance in the choice and treatment of materials and becomes a sustainable unity when proper production processes and conditions are ensured. We are certified as both FSC and B Corp, which means that we honour the demands and principles of sustainable production and business management. We truly believe that quality is here to stay and that we can make positive changes together.

**FSC-certified wood** FSC is a global non-profit organisation that ensures responsible forestry. FSC means that the workers never fell more trees than the forest can reproduce and the biodiversity of the woods is preserved. FSC also means that the forestry workers are treated respectfully and have proper working conditions, just as FSC supports and cares for the local community. At Skagerak we are committed to expanding FSC-certified forests, so they can supply more FSC wood in the future. At this time it is still a challenge to ensure FSC teak, but we ambitiously pursue our goal of being 100% FSC-certified across all wood types by 2025.

*Skagerak has been FSC-certified since 2003. Our certificate number is FSC™ C004462.*

**UN Global Compact** As a member of UN Global Compact, Skagerak incorporates fundamental responsibilities in the areas of human rights, labour, environment and anti-corruption. We incorporate the Ten Principles of the UN Global Compact in our strategies, policies and procedures because we believe it makes a difference, and because we want to uphold our basic responsibility to people and the planet. Every year we report our actions directly to the UN Global Compact.

*Skagerak joined the UN Global Compact in 2011.*

**B Corp** is another priority that we are particularly proud of. B Corp – Benefit Corporation – is about balancing purpose and profit and using business as a force for good. As a B Corp member we set the highest standards for social and environmental performance, accountability and transparency and strive to incorporate these ambitions into our everyday business practices.

*Skagerak was certified as a B Corp business in 2017.*

**Reclassic** At Skagerak we are dedicated to the products we create and to ensuring their long lifespan. That is why we have invented Reclassic. Reclassic is another way that we enter the orbit of maintenance and sustainability. Skagerak lets you return your old furniture in exchange for a new purchase. Reclassic is our take-back guarantee as a further incentive for you to care for your Skagerak furniture and protect the environment. When you buy a new piece of furniture, you can sell it back to us years later, provided it has been well maintained, and the Reclassic piece will get a new life in a new home.

*Reclassic was initiated in 2017.*

**Five Year Warranty** At Skagerak, long-lasting design means long-lasting life. Our outdoor furniture is built to last, and it lasts longer and better when it is maintained properly. We offer expert guidance on the best care and maintenance of Skagerak furniture, so you can keep your furniture looking beautiful for many years to come.

*We have a five-year guarantee on our products.*

Lily Table, Chair & Bench

## MATERIALS/ OUTDOOR

Skagerak uses quality wood. Wood that will stand the test of time and is produced under responsible terms and conditions. We mostly use FSC-certified wood, and we work as ambassadors to help increase the number of certified woods to meet the demand. Skagerak is increasing the share of FSC wood in our products every day in pursuit of our ambitious goal of being 100% FSC-certified across all wood types by 2025.

Did you know that the CO<sup>2</sup> contained by FSC wood remains in the timber, even after it has been turned into furniture and is not released into the atmosphere until it is scrapped? This means that if you keep your furniture for 50 years, the CO<sup>2</sup> is contained within the material the entire time.

**Teak** Quality teak is commonly found in South East Asia and Central and South America. Our FSC-certified teak comes from Central America and Brazil, while the rest of our teak comes from plantations in Indonesia and Trinidad managed to sustain a renewable and reliable supply of wood. Teak is a heavy, hard and sturdy wood type. The high content of natural oils makes it highly weather- and rot-resistant – perfect for outdoor furniture you want to use outside all year round. If untreated, the teak develops a beautiful silver-grey patina over time.

**Lacquered Meranti Wood** Skagerak's meranti comes from Indonesia and is a strong, durable type of wood that is the perfect choice for parasol poles. This exotic wood comes in a variety of warm colours that develops very little patina.

**Western Red Cedar** This wood type is commonly found in western North America. Skagerak's western red cedar comes from Canada and is PEFC-certified, sourced from sustainably managed forests. Western Red Cedar is a good choice for outdoor furniture as the wood is naturally resistant to bugs and insects, mould, decay and bacteria. As the wood ages, it develops a beautiful silver-grey patina

**Painted Sapelli Wood** Sapelli wood is found throughout Central Africa; ours comes from the Republic of Congo and is FSC-certified, which ensures sustainable forest management. Sapelli's sturdiness and high density makes it an unrivalled choice for painted wood designs. The specially developed paint is applied layer upon layer with intermediate sandings between each step, continuing until the surface is completely smooth. The paint also protects against green growth and discolouring, making for a resilient product suited for outdoor usage all year round.

**Powder-coated Steel** Steel is a strong, timeless and malleable material enabling designs with thin profiles and various patterns and shapes. To minimize corrosion, the steel is electro-galvanized

with a protective layer of zinc and finally it receives a decorative powder coating – a high-quality dry finishing process that provides a stronger and more streamlined surface than conventional liquid paint.

**Powder-coated Aluminum** Powder coating is a high-quality dry finishing process that makes it possible to create a thicker and more streamlined surface than with conventional liquid paint. A two-layered coat is applied to the light-weight aluminum to make the material resistant to moisture, UV light, scratches and corrosion.

**Compact Laminate** High-pressure laminate is made of multiple layers of kraft paper dipped in resin and compressed under heat to form a hard, homogenous sheet. The top and bottom sheets are coloured and impregnated with melamine, which makes the material extremely durable and impact-resistant.

**Terracotta** Low-fired clay, also known as terracotta, is a beautiful type of earthenware. Skagerak's terracotta is hand-thrown in Portugal, which gives each pot a unique expression. Terracotta means 'baked earth' in Italian, and the pottery technique can be traced back to ancient Greece.

**Parasol Fabric** Our durable parasol fabric is made from 100% spun polyester. Polyester yarn does not wrinkle or shrink and provides a colour-fast, stain-resistant material. Furthermore, the fabric used in all our umbrellas, except Catania, is Teflon-treated, which makes it water- and dirt-repellent (although it is not entirely waterproof).

**Cura Oil, Nature**  
Skagerak Design

1103043  
Treatment for wood products  
0,5 liter

*When placing untreated wood outside, it will patinate over time and become silver-grey in the end. If you wish to preserve or intensify the original dark/golden/honey brown colour, use Skagerak's natural oil for outdoor furniture. The oil is designed to protect and strengthen wood types such as teak, western red cedar, cherry, and mahogany. As the natural oil saturates and darkens the surface a little, it brings out the natural beauty of the wood and leaves it well-nourished, resistant to water, dirt and grease.*

## PILLOWS & CUSHIONS

Skagerak's outdoor cushions and pillows are made to last – just like the furniture they are designed to accompany, adding comfort to the outdoor space. We use two types of outdoor fabric: Agora and Acrisol.

**Agora** is a 100% solution dyed acrylic and Oeko-Tex-certified fabric which is extremely colour- and lightfast. Furthermore, the fabric is water, dirt and mildew-repellent.

**Acrisol** is a 100% acrylic Dralon® fabric, which is extremely colour- and lightfast as well as water- and dirt-repellent. We use this fabric when we need an exceptionally strong outdoor textile and when we want a striped design for our furniture.

For cleaning, wipe the fabric with a firmly wrung cloth. In case of more obstinate stains, remove the upholstery and machine wash at 30° C.

The cushions all have different functions and therefore come in different shapes, textures and sizes. At Skagerak we use three types of fillings: Quickdry Outdoor Foam, Fossflakes and Kapok.

**Quickdry Outdoor Foam** has an open structure that allows both water and air to pass through. This makes the cushion dry exceptionally quickly – even after a heavy downpour. Moreover,

the foam provides a firm and comfortable texture that remains the same year after year. We recommend placing the cushions upright for quick drainage. Soon after, the cushion will be dry and the cushion can be used again.

**Fossflakes** is an allergy-friendly polyethylene known for its superb ability to maintain its volume and shape over time. In addition, Fossflakes provides excellent temperature regulation because the structure of the material allows air to circulate within the cushion.

**Kapok** is a natural hair-like fibre that is extremely light, water-repellent and hypoallergenic. Our kapok cushions are machine washable at 30° C and should always be tumble-dried at a low temperature to maintain their shape and prevent clumping.

*Important note: Under current UK law, Skagerak is not able to provide outdoor cushions and pillows with the same filling as the regular collection. We still offer cushions and pillows in an outdoor textile with weatherproof properties, but the filling is not weatherproof due to stringent (indoor) fire regulations. We therefore recommend that you bring cushions and pillows indoors in heavy rain and when they are not in use.*
